INTRODUCTION

We have pleasure to introduce ourselves as Shriyan Enterprises known for beverage filling and processing machineries for the last 30 years in India and Abroad. Shriyan Enterprises was founded by Late Mr. Yogesh Shriyan in 1970 in Mumbai. Over the years our Company has grown substantially with the great leadership of Late Mr. Yogesh Shriyan.

Our Company has constantly upgraded its technological capabilities in beverage packaging and processing machineries. We had continuously monitored market needs and developed products that closely focus the ever changing market environment. Our designing and production team fully incorporated CAD technology in all production solution development. Our mission is to deliver the most advanced yet price- attractive products to each and very customers.

We have successfully supplied to many reputed Multi National clients in India and Abroad with our filling and packaging machineries. Our Company is fully committed to its quality and performance of the machineries supplied to the clients.

Our machineries are equipped with the world class components, besides, our service is ever ready for our customers. All these 30 years we have survived in the market with our Sincere commitment towards service and quality of our products.

After 30 successful years of service now we are proud to say that " **HAPPY TO RUN FOR YOUR BUSINESS.**

We sincerely hope to have long term mutually beneficial business relation with all our valued customers.

Yours Faithfully,

PRODUCTS AND SERVICES

- ★ Mineral water processing filling and packaging machineries
- ★ Soda and Soft drink processing filling and packaging machineries
- ★ Fruit juice processing filling and packaging machineries
- ★ Flavored milk filling and packaging machineries for glass bottle and HDPE bottles (Amul Kool all machineries in all India basis supplied and maintained by us)
- ★ Semi automatic rinser, filler and capper system for water, soda and fruit juice production line
- ★ Counter pressure glass bottle filling machine
- ★ Cooling and Warming tunnels for Carbonated and Hot fill production line
- ★ 20 liter jar filling machinery Rotary and linear
- ★ Label inserting machinery
- ★ Hot glue labeling machinery
- ★ Shrink wrapping machinery Air and slat conveyors
- ★ Water treatment plants

BLOW MOULDING MACHINE

Sai Water Pvt. Ltd. Is a prominent Manufacturer, Exporter, and Supplier of a extensive assortment of Plastic Extrusion Blow Moulding Machines. We deals in mainly exports of Plastic Processing Machinery international. Managed via directors having wealthy understanding in their respective fields of operation.

Our bottle blowing machine is suitable for generating PET plastic bins and bottles in all shapes. It is broadly used to provide the carbonated bottle, mineral water, milk bottle, pesticide bottle, oil bottle, cosmetics bottle, huge-mouth bottle and warm fill bottle etc.

Automatic Blowing

Two Servo Motors, controls Preform Feeding and Preform Transfer System.

The most superior excessive frequency Infrared Lamp, growth heating efficiency 30%-50%.

Efficiency Constant Temperature Oven.

Adopting advanced world famous emblem additives in pneumatic elements ,electric elements and operation elements.

Overall pc manage, clean to function.

Can connect with the air conveyor and filing gadget.

Semi Automatic Blowing

Semi automatic PET bottle blowing system is appropriate to produce mineral water and gentle drink bottles. Feeding machine carries the preforms automatically. Infrared lamps followed in the pre-heater to warmth the PET preforms.

Semi-automatic technique with low funding, high performance, quick and secure operation, smooth trouble shooting, upkeep and other benefits.

LINER AND ROTARY BULL JAR FILLING MACHINERIES

AUTOMATIC LINEAR JAR FILLING MACHINERIES

The jar filling machineries designed for high production utilizing very less manpower and energy. The jar filling machines available with complete production line; De-capper, external brushing internal brushing and rinsing, fling, capping, shrinking units followed by conveyor for transferring filled jars. All components used in these machineries are from world renowned companies. These machineries are PCL controlled Capacities: **100 to 900** jars per hour. The machine designed for linear filing method.

AUTOMATIC ROTARY JAR FILLING MACHINERIES

Rotary jar filling machines are used for large production. These machines comprise of de-capper, ternal brushing, internal brushing, multi stage internal rinsing, rotary filing capping and cap sleeve shrinking. The state of the art machines designed to very high standard. The robust machines are highly durable. heavy duty and user friendly. The high production ute dramatically reduces the cost of producti designed to maintain best hygienic conditions its operation. The machines designed to maintain best hygienic conditions its operation. Production capacities ranging from 1000 jars to 3000 jars per hour.

AUTOMATIC MONOBLOCK WATER FILLING MACHINERIES

These machines are equipped with world class components and the material of construction is Stainless steel, All liquid contact parts are 55 316L and the remaining are S5304. The machined and fabricated components are made out of CNC machine. Capping heads are magnetic constant torque equipped to ensure capping quality with no damage. These machineries known for non-stop high speed production while Using very minimum manpower. Various models and capacities from 25 BPM to 100 BPM.

AUTOMATIC COUNTER PRESSURE FILLING MACHINERIES

FOR CARBONATED BEVERAGE

The best carbonated beverages have fresh and rich taste. The carbonated drinks manufacturers pay much attention to the following.

- 1) Sufficient CO_2 content in the bottle
- 2) Maintain the best original taste
- 3) Ensure beverage quality and shelf life
- 4) Reduce the bottle weight while ensure the bottle stability

The Carbonated filling technology is the highly engineered and sophisticated system. Only few companies around the world can make the best CO_2 counter pressure fillers. The simple reason is CO_2 involvement in the product and Also the nature and taste of the end product. The proper balanced filling of CO_2 and the liquid is required to maintain the taste of the product. The automatic process accurately measures the syrup ratio and the g volume in the auto process setup. Our counter filling machines and Super mixers are working in reputed companies around the world We can supply machines from 3000 BPH to 30000 BPH.

AUTOMATIC HOT FRUIT JUICE FILLING MACHINERIES

The hot filling automatic Mono block machinery is the finest engineered piece of its kind. The tank less filler has all the new generation development incorporated. The hot filling technology has come a long way and many successful projects installed for reputed multinationals world-wide. The machine is designed such a way that the product temperature is constantly maintained throughout the filling process. The contamination free bottle holding and transfer system is the unique part of this machine. No product or packing material wastage while filling. The machine built in with CIP provision therefore, the machine is completely contamination free. User friendly machine works with the help of PLC and touch screen. **Capacities: 3000BPH to 40000BPH.**

DOWN STREAM PACKAGING MACHINERIES

FOR VARIOUS BEVERAGE BOTTLES

AUTOMATIC SHRINK SLEEVE INSERTING AND SHRINKING MACHINE

Sleeve inserting and steam shrinking machine is the finest piece of engineered product. Automatic sleeve inserting machine is PLC controlled and saves huge amount on labor. Heavy duty and user friendly with no wastage of labels and maintains uniformity on all the bottles.

AUTOMATIC SHRINK WRAPPING MACHINERIES

PLC controlled widely used for pet and canned beverages. Various models available with several additional options for shrink wrapping. Shrink wrapping saves lots of investments on the carton boxes.

BOTTLE CONVEYING SYSTEM

EMPTY BOTTLE AIR CONVEYOR SYSTEM WITH
AIR BLOWER AND FILTER

FILLED BOTTLE CONVEYING AND BUFFING SYSTEM

CAPPING MACHINE

AUTOMATIC CAPPING MACHINE

Wide range of 1- head capping machines in semi-automatic & fully automatic modes of operation. We design all kinds of capping heads for aluminum caps, plastic screw caps, lug caps, press-fit caps, etc. The machine has a robust construction and comes with a feature of adjustable torque. We also provide a pick & place assembly in a single head capping machine for longer caps.

MULTI HEAD CAPPING MACHINE

Multi-head capping machine for a very high-speed application and offers a special machine of pick & place for special caps. The machine is built with precision on a sturdy Welded steel frame completely enclosed in a stainless-steel sheet and doors are provided to facilitate the servicing of the machine. We design all kinds of capping heads like aluminum cap, screw (plastic) cap, lug cap, pressing cap, etc.

SPINDLE CAPPING MACHINE

Capping machine for flat bottles in 1-head liner and spindle cap per for multi-stage tightening and displaying torque. All the machines are GMP models and our main aim is customer satisfaction. All machines are constructed in stainless steel.

LABELING MACHINE

AUTOMATIC ROUND BOTTLE STICKER LABELING MACHINE

Range:- Length :- 10 mm to 450 mm
Height:- 20 mm to 200 mm

SAI WATER wide range of round bottles labeling with very high accuracy of without cut and overlapping applicator. This model is fully automatic and has a smooth stainless steel finish. The equipment includes a number of user-friendly features, such as the most modern micro processor controlled system for dispensing the labels as well as the latest system for sensing labels and products. No change parts are required for different size of bottles.

AUTOMATIC ROUND AND FRONT-BACK STICKER LABELING MACHINE

Range of Label:- Length 10 mm to 250 mm
Height 10 mm to 250 mm

SAI WATER is an expert in manufacturing labeling machine for front & back application with accuracy & precise high positioning. The distinctive feature of this machine is "no change parts" required for different dimensions of containers and also less tool adjustment in order to adjust various sizes of containers therefore down time is very less.

HORIZONTAL STICKER LABELING MACHINE

SAI WATER is an expert in manufacturing labeling machine for flat bottles, one side labeling machine with accuracy. The distinctive feature of this machine is "no change parts" required for different dimensions of containers. We are also offering horizontal labeling machine for tubes, boxes, books, top of the container cap with high speed.
